Understanding PATIENT CENTERED MEDICAL HOME

A Patient Centered Medical Home is a collaborative approach to healthcare that brings together our team of experts to address and coordinate your medical care in achieving an optimal patient experience.

What to expect from your Care Team:

- Your Patient-Centered care begins in your primary care providers' office
- Our team of healthcare experts promise to partner and listen to you in meeting all of your healthcare needs
- Coordination of care with clear and concise health coaching and guidance
- Assistance with community based needs
- Building trust and respect

Your Healthcare Role:

- Collaborate with your physicians
- Keep us informed of any health related concerns you may have
- Participate in all of the decisions regarding your health
- Adhere to the healthcare guidance and treatment plans that are given to you
- Ask questions

Our team of experts value your health and their role in your Patient Centered Medical Home. We will ensure that each visit to your primary care medical home is efficient and customized to your needs.

Your medical team is here to provide quality services
