

WHAT YOU NEED TO KNOW

Florida's New Immigration Law (SB 1718)

Traveling into Florida

Knowingly transporting an undocumented person into the State of Florida is not allowed.

Community IDs

Local governments are no longer allowed to provide funds for community IDs. However, Community Health Centers are still able to use community IDs for patient identification purposes.

E-Verify

Businesses with more than 25 employees must use E-Verify to confirm the legal working status of all employees.

Seeking Health Care

Only hospitals will be required to ask for a patient's immigration status. However, regardless of status, everyone still has the right to access healthcare.

Driver's Licenses

Out-of-state driver's licenses issued specifically for undocumented people are no longer valid in Florida, and those who drive with them can be fined and potentially detained.
